Fleet Management

Category Enabled

Register & Manage Vehicles

Allows registering new fleet assets, assigning ID tags, and updating technical vehicle profiles.

Dispatch Operations Control

Enables dispatching drivers, assigning routes, and issuing immediate operational overrides.

Configure Telematics Rules

Configure sensor thresholds, GPS ping intervals, and active speed limit geo-fencing policies.

Documents & Compliance

Category Enabled

Verify Driver Credentials

Audit and approve submitted driver licenses, medical fitness forms, and commercial insurance policies.

Issue Legal Compliance Overrides

Allows manual bypass of regional regulatory holds in exceptional/emergency contexts.

Purge Expired Audit Files

Permanently delete historical physical records in accordance with institutional data retention policies.

Alerts & Notifications

Category Enabled

Broadcast Emergency Messages

Initiate system-wide high-priority flash notifications to all actively active fleet drivers.

Configure Slack/Webhooks Alerts

Route automated telemetry warning spikes directly to internal dev ops channels.

Reports & Analytics

Category Enabled

Generate Monthly Compliance Audits

Compile comprehensive, cryptographically signed security compliance dossiers.

Export Raw Telemetry Streams

Export unprocessed time-series GPS, speed, and fuel telemetry as JSON/CSV streams.

User Management

Category Disabled

Create Field Operator Accounts

Allows provisioning profile shells for junior and contract field team members.

Modify Operator Security Access

Assign, edit, or strip explicit security permission flags from active operators.

Changes will require approval from Rajesh Kumar's supervisor.
